

# Why We Choose the ESP32-S3

- ESP32-S3 is low cost, widely available, and powerful.
- Built-in Wi-Fi and BLE support in Zephyr.
- Excellent choice for learning because you can focus on Zephyr APIs, not vendor SDK complexity.
- Zephyr abstracts peripherals cleanly: GPIO, I2C, SPI, Wi-Fi, and more.
- Integrated debug support (USB JTAG) makes development and troubleshooting easy.

Key idea: The ESP32-S3 is a developer-friendly platform for learning Zephyr.
